

MALTA

MALTA HARNESS ACCESSORIES

Since 2015, Malta Dynamics has supplied top-quality workplace safety gear directly to users. With over 600 field employees, we prioritize their needs, testing products extensively to ensure they meet real-world demands. This commitment has made us a leading name in safety, known for our **Field Tested, Field Approved** products.

PART #	ACCESSORY	WEIGHT
HEA1000	TREE STRAP	.6 LBS
HEA2000	CLIMBING STRAP	1.4 LBS
HEA3000	SUSPENSION RELIEF	.2 LBS

TREE STRAP

Our Tree Strap is crafted to accompany our complete line of Malta Hunting Harnesses perfectly. This strap is made with high-strength polyester webbing that won't rip or tear and provides ideal friction to keep you safely attached to the tree. The strap allows you to anchor safely to the tree during your hunt. Tighten the tension buckle around the tree high enough to keep your harness tether taut when in a seated position, attach the tether to your harness, and safely hunt from all angles.

LINEMAN'S CLIMBING STRAP

Our Lineman's Climbing Strap is crafted to accompany our complete line of Malta Hunting Harnesses perfectly. Using the strap allows you to safely climb a tree to install your tree stands or steps while keeping your hands free. The high-strength polyester strap is easily adjustable and features steel carabiners that attach directly to the sewn-in Lineman's Loops on our Malta Hunting Harnesses. Wrap the strap around the trunk and adjust the tension using the steel buckle as you climb the tree.

DEER DRAG/SUSPENSION RELIEF STRAP

Our Deer Drag/Suspension Relief Strap is a dual purpose hunting safety accessory. The strap has been designed to work seamlessly with our complete line of Malta Hunting Harnesses. Arresting an accidental fall is just the first step to making sure a hunter is safely rescued. In the time it takes to retrieve the fallen hunter, numerous secondary complications and injuries can occur. If a fall occurs, step into the loop located on the end of the Suspension Relief Strap and alternate standing on each foot to allow blood to keep circulating freely throughout the body. To use the strap as a Deer Drag, wrap the loop around the deer's limb to create a slip knot and start your drag.
